- Problem Solver
- Critical thinking

Projects

Conversational chatbot for call center

- Developed an interactive chatbot to enhance user engagement and automate customer support.
- Engineered the chatbot using Rasa for natural language processing and dialogue management.
- Built and optimized data models in Rasa to accurately interpret and respond to user queries.
- Developed the frontend interface using React, ensuring a seamless user experience.

Technologies : Python , Rasa , flask, Java Script

Online food order system for Easy Eat Shopping Store

- Designed and implemented an Online Food Order System for Easy Eat Shopping Store.
- Utilized PHP and JavaScript to develop the frontend, allowing customers to browse and place food orders.
- Implemented a backend system using PHP to handle order processing, inventory management.
- Utilized MySQL database for efficient storage and retrieval of food items, customer details, and order history.

Technologies : HTML, CSS, PHP, MySQL, JavaScript

Payroll Management System

- Developed a comprehensive Payroll Management System using Laravel, MySQL, and Tailwind CSS.
- This system efficiently manages employee attendance, automates salary generation, and generates detailed salary slips. The technology stack ensures a robust and modern web application

Technologies : Laravel ,Tailwind CSS, MySQL, JavaScript
